OUTDOOR MOTION DETECTOR
EWP-EXT

DEVICE ACTIVATION

1. Unscrew a single screw to open the plastic enclosure.

2. Check the position of DIP switches: DIP2 must be ON, and the rest of DIP switches (i.e. DiP1, DIP3 and DIP4) must be OFF.

3. Unscrew the hardware board (remove all 4 screws using a screwdriver).

4. Connect the battery (insert the wiring contacts).

5. Check and remember (write down) the ID number of EWD3 device.

6. Mount the device's plastic enclosure to the wall or another surface (follow the recommendations from the original manufacturer's manual).

ATTENTION!: *Before mounting the device, you **must check the wireless signal first!***

7. Put the hardware board back in its place and screw it back in (use all 4 screws).

8. Close the plastic enclosure.

9. Screw in the plastic enclosure (use the single screw).

10. Connect the device to the system via *Eldes Utility* software.

DEVICE CONNECTION TO THE SYSTEM

1. Launch *Eldes Utility* software and add the new EWD3 device to the system using its ID number (see *DEVICE ACTIVATION step No 5*).

2. Configure the first EWD3 zone (Zone 1), setting it as a 'Digital zone'.

NOTE: *'Digital zone' is designed for causing an alarm (by default) if the wired digital sensor, connected to Z and COM terminals, is triggered, while the system is armed. This mode **does NOT** operate with Flood sensor mode on Zone 2 simultaneously.*

3. Change zone's name (optional).

4. Set zone type to 'Instant'.

5. Set the 'Alarm Count to Bypass' value to zero (0).

6. By default, zone's attributes 'Force' and 'Stay' are turned 'OFF'. We recommend leaving it like that.

7. Set the 'Input connection mode' to 'NC' position.

8. Set the 'Tamper Enabled' option to 'ON'.

9. Change tamper's name (optional).

10. Save the configuration (click 'Write settings').

! ***Please be aware that the new Eldes solution is based on a third-party device.*** *For more information about this solution, visit eldesalarms.com.*

! *According to the original manufacturer's manual, the default 'Inhibition time' between alarms **is 3 minutes**. Please check the original manufacturer's manual for more details.*
